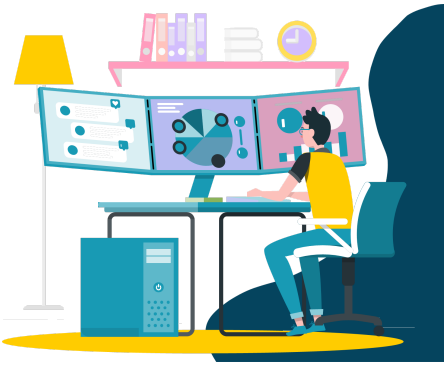
LIGMOS provides ERP solutions to businesses. We are dedicated to helping organisations with their ERP-related challenges by delivering world-class products and services that make ERP Master databases more accurate, quick, and simple.

OUR PRODUCTS



MyMDM

Helps organizations create & manage their master data. It helps to ensure data accuracy and consistency across multiple platforms. It also helps to ensure data integrity and security by providing features such as user authentication, customisation, and access control.

MyCOLE

Get complete visibility into your order performance with MyCOLE. Our end-to-end reporting tool allows you to track every step of the order process, from the time it is received to when it is dispatched and delivered.

- Real-time
- Traceability
- Multi-platform Single view
- Performance reporting

OUR SERVICES

We offer a range of managed services & resources to help you with your ERP-related challenges. Our experienced professionals can help you with:

- Custom projects
- Custom reports
- Process integration
- Business intelligence

> *“ We’ve been using MyMDM for a few months now and I can honestly say* it has transformed our Master data creation & management experience. I would recommend it to anyone. ”
>
> - Anthony Wilshow, CTO, The Home Group
